## **PRESS RELEASE**

(REVISED)

### **Q1 FY'14 Total Income at Rs. 2,523.7 Million Q1 FY'14 Profit after Tax at Rs. 502.4 Million**

Hyderabad, Monday, August 12, 2013:

Nava Bharat Ventures Ltd (NBVL) announced its audited results for the quarter ended 30<sup>th</sup> June 2013.

#### **Q1 FY 2014 (standalone) financial review:**

In Q1 FY2014, the Total Income of the Company stood at Rs. 2,523.7 million which reflected the transmission constraints and low merchant realisations affecting the Odisha power operations and the temporary stoppage of the ferro chrome conversion which resumed in July. The manganese alloy business absorbed higher captive power tariff applicable in AP and to that extent the EBIDTA margins got affected in that segment. The EBIDTA margins in power segment were lower due to higher blend cost of fuel and lower volumes on account of maintenance outages in AP power plants. Sugar division performance was on seasonal lines and the realisations remained static over the previous quarter. Profit Before Tax therefore contracted and stood at Rs. 567.9 million while the Profit After Tax stood at Rs. 502.4 million in Q1 FY2014.

#### **Performance of 150 MW power plant under Nava Bharat Energy:**

The 150 MW power plant, implemented by Nava Bharat Energy India Ltd, subsidiary of the Company was quite satisfactory. In the very first quarterly operations the plant maintained a PLF of about 80%. The power plant operations are however exposed to the foreign exchange volatility for coal imports though availability of the fuel has been normal.

### **The new 64 MW Power plant in Odisha**

This 64 MW unit plans to commence generation shortly though initially at low loads, to keep the unit in readiness to generate and sell power as and when merchant power realisations scale up.

### **International operations**

The international operations principally relate to Zambian coal and power project where 65% control is exercised through the Singapore Subsidiary. The project has gained good traction with all major civil works and manufacturing of equipment peaking up. The Zambian company has been able to achieve increased sales volume though significant change can only be possible with power generation from 2015-16. Other international projects like Hydel Power project in Laos and commercial agri projects in Tanzania are under development with minimal necessary exposure of the Group.
